-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rinck in view of Davies. Rinck discloses the basic claimed structure including a protective device 1 for the drive unit of a watercraft with two housing parts 3, a lip and a hinge 12. Not disclosed by Rinck is a lip seal. Davies teaches a cover with a hinge and a lip seal 13. It would have been obvious to a person of ordinary skill in the art at the time the invention was made to form the device of Rinck with a lip seal as taught by Davies to seal the housing for improved propeller protection. Additionally, the intended use including the watercraft structure appear to be disclosed by Rinck. However, it is noted that intended use defines no patentable structure. Further with respect to claim 3, it would have been an obvious choice of engineering design to form the shell parts of fiber reinforced plastic for improved strength.
